

Newsight Japan booth
at FineTech Japan/Display2013
held in Tokyo, Japan

April 10-12, 2013

NEWSIGHT
Japan

3D + Multi-Panel

2X2 system with four units of 24” displays.

42" Glasses-free 3D display
(Lenticular lens type)

Content was created by a Chinese
creator in Beijing.

24" Tablet 3DTV(Prototype)

This is the future of personal 3DTV in the near future. All of 2-view based 3D content are automatically converted into 6-view to show good quality 3D images without glasses.

3D + Aqua

Water tank is equipped in front of 24” 3D display. People can enjoy 3D images in the water.

One of the best eye catch for people looking around.

3D + Touch

Touch panel can be equipped on 24" display for adding actions for specific purpose.

Kiosk terminal for convenience store is one of the strong candidate for this feature.

3D + Focused Sound

Focused directional thin speaker is equipped with 24" 3D display. This is one of the way to catch people and make them stop in front of signage.

3D + Scent

Scent of coffee is offered to people in front of display shown coffee signage. Scent is another factor adding value on 3D signage.

3D + Image conversion

2D image is converted into 8-view 3D images offline by software. Content is important and Newsight Japan collaborates with major 2D3D conversion studios for preparing multi-view content .

3D + Shooting

Newsight Japan collaborates with 3D camera rig manufacture for shooting 3D content.

Newsight Japan offers 2-view to real time multi-view conversion system to check recorded content which is now under development and evaluation.

3D business is different from conventional business which I named 2D business.

Newsight Japan is a company which establish 3D business model for customers.

Newsight Japan will make things happen in 3D business field.

Thank you for your assistance and support.

Kiyoto Kanda
President & CEO
Newsight Japan Ltd.
