

8-view 3D content generation system evaluation kit for  
3D gaming and 3D digital signage business

July12, 2013

Newsight Japan Ltd.

Tokyo, Japan

Newsight Japan (Headquartered in Tokyo, Japan/CEO Kiyoto Kanda) announced to release 8-view 3D content generation system evaluation kit for customers in gaming and digital signage industry.

Conversion box, which fully-automatically converts 2D content into 3D/8-view content. It also accepts 3D/2-view (Side-by-Side/Half) content converting into 3D/8-view content. Newsight Japan is one of the leading company for supplying 3D display without glasses both to digital signage area and gaming area..

The system accepts any 2D content for the use of 3D digital signage and 3D gaming. Newsight Japan can offer custom-made 2D3D conversion chip module upon request basis. Those chips generate 8-view content for Newsight Japan's glasses-free 3D displays to add value on digital signage and gaming business.
